

STERLING SPV Series Remote Proportioning Valve

SPV Series. Remote Proportioning Valve.

SPV Remote Proportioning Valve provides reliable proportioning from 0 to 100% of two materials (typically virgin and regrind). A convenient window provides immediate inspection. Quick-release top enables fast, easy cleanout for material changes. 45 degree angled design decreases flex hose wear for less maintenance.

Features:

- Corrosion resistant Aluminum construction
- Air operated
- 24VDC or 110 VAC operation
- Dual Solenoid operation (except 3")
- Material Viewing window
- Quick release lid for east cleaning
- Lanyard attached to lid to prevent loss
