

BROWN S-Series Vacuum Shuttle Thermoformer

S-Series Vacuum Shuttle Thermoformer.

Advanced Features at an Affordable Price

The most precise and repeatable multi-station vacuum shuttle equipment available. A horizontal sheet car indexes the cut-to-size sheets through load/unload, heat and form stations. Male or Female Tools on either the top or bottom platens with a variety of process routines including Vacuum with Plug Assist, Vacuum with Billow Box, Vacuum Pull, Vacuum Blow and Snapback are easily performed.

Vacuum shuttle machines with non-proprietary computerized control, high speed electric direct drive platen systems, high watt density energy efficient ovens and controls, electric shuttle car, multiple clamp frame options and high flow pneumatics are available to your exact specification.

Safety Features:

- Perimeter guarding designed to provide high visibility with light curtains in the load / unload area
- Electrical interlocks on guards requiring frequent access
- Bilingual with pictographic safety tags
- Main electrical disconnect with padlock
- Emergency stop buttons
- All safety features should be in place and functional at all times
